About Us

Kubebooth was founded because of our core belief that *privacy matters!*

We believe that everyone should have access to a private space where they are free to be their most authentic selves. That is why we developed our signature Kubebooth Collection - a set of prefabricated modular booths designed for optimal acoustic performance. Our booths provide a quick, simple and affordable solution to the lack of privacy common in workspaces.

Key Features

36 dB NOISE CANCELLATION

With Certified sound insulation system of 36 dB, we can honestly say that we provide you with the best soundproof booth that guarantees privacy.

MOBILITY

Our signature collection comes equipped with hidden casters to enable quick changes in a fast-paced world.

EXTENDABLE

We provide unparalleled flexibility with a variety of booth sizes, including Ki, Kme/Kwe, Kteam, and Kteam+. Our modular expertise allows you to begin with a Kme or Kwe and expand up to a space for eight, providing limitless possibilities for your booth requirements.

RAPID LEAD TIME

Our dedicated team's hard work allows us to proudly offer a lead time of 3-4 weeks.

ENVIRONMENT FRIENDLY

We use CNC machinery to precisely cut and shape our products, minimizing material waste. Our products meet GreenGuard indoor air quality standards and are made with recycled metal and responsibly sourced wood to ensure sustainability.

Key Features

CUSTOMIZABLE

We provide a wide variety of exterior and interior finishes, so you can truly personalize your booth and match the aesthetic of your workspace.

PLUG & PLAY

No need to hire an electrician, simply plug in the booth and get started, making setup quick and hassle-free.

FRESH AIR SUPPLY

We have 100 air exchanges per hour with motion activated fans that ensure a safe and comfortable space to work.

EFFICIENT - MOTION ACTIVATED

The LED lights and fans are motion activated as you step into the booth.

Accessories

TOUCHSCREEN CONTROL PANEL

OCCUPANCY LIGHTS

SMART DOOR LOCK*

(Only available on select units)

SEISMIC BRACING

In-house Manufacturing

CNC Machinery:

State-of-the-art CNC machinery to precisely cut and shape our products resulting in not only high-quality, consistent products but also minimizes material waste by using only what is necessary.

Recycled Metal:

By repurposing metal, we reduce the demand for new materials and help minimize waste.

GreenGuard Certified Materials:

Our products meet rigorous standards for indoor air quality and contribute to a healthier, more sustainable work environment.

Wood from Sustainable Forests:

We use wood that is responsibly harvested and replanted to ensure that forests remain healthy and productive.

Our Diverse Clientele

All-sized businesses in need of open-space solutions that are both functional and stylish.
